### **DETAILED ACTION**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 23 recites the limitation "indicia" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 24 recites the limitation "reference marks" in line 2. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 8-18 and 20-27 are rejected under 35 U.S.C. 102(b) as being anticipated by George.

George discloses a cutting apparatus comprising: a first mandrel configured to support a substantially cylindrical spinal implant; and a cutting blade (162) moveable from a first position at which spaced from spinal implant supported on first mandrel (12) to a second position at which it is in cutting engagement with the spinal implant; wherein the spinal implant is configured be rotated with respect the cutting blade; wherein the first mandrel is configured to support a hollow spinal implant such that the spinal implant is slidably mounted on the first mandrel (12). The first mandrel appears to be inherently

Art Unit: 3722

detachable from the apparatus to permit loading and removal of the spinal implant on the mandrel. 5. Also disclosed is a means for rotating the first mandrel (not numbered). With respect to claims 10,11,19 and 22, applicant's attention is directed to column 2, lines 52-72. George discloses the use of reference marks and indicia.

Further the claimed intended use of a "spinal implant and an "intervertable spacing measurement from a caliper" have not been given any patentable weight, since a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

#### ***Allowable Subject Matter***

Claims 6,7 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

Applicant's arguments filed 10/27/06 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the specific structure of the elements that allow the detachably) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification,

Art Unit: 3722

limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Further, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
